

NRG Energy, Inc. Reports Third Quarter Results, Remains On Track with Transformation Plan and Initiates 2018 Financial Guidance

November 2, 2017

Key Highlights

- Transformation Plan on track with \$92 million in cost savings realized through September 30, 2017
- Initiating 2018 Adjusted EBITDA and FCFbG guidance
- Repurchased \$604 million¹ of corporate debt, delivering approximately \$47 million of annualized interest savings, completing 2017 capital allocation plan
- Closed drop down of a 38 MW portfolio of solar assets to NRG Yield and formed a new partnership with NRG Yield focused primarily on community solar projects

PRINCETON, N.J.--(BUSINESS WIRE)--Nov. 2, 2017-- NRG Energy, Inc. (NYSE: NRG) today reported third quarter income from continuing operations of \$190 million. Income from continuing operations for the first nine months of 2017 of \$120 million, or \$0.58 per diluted common share, compares to a loss from continuing operations of \$92 million, or \$0.10 per diluted common share for the first nine months of 2016. Adjusted EBITDA for the three and nine months ended September 30, 2017, was \$806 million and \$1,876 million, respectively. Year-to-date cash from continuing operations totaled \$844 million.

"I am pleased with the progress we have made on our Transformation Plan," said Mauricio Gutierrez, NRG President and Chief Executive Officer. "While we executed well in the third quarter, our results were impacted by mild temperatures and Hurricane Harvey. I am encouraged by the market recovery in Texas and the multiple regulatory initiatives that highlight the urgent need for power market reform."

Generation: Third quarter Adjusted EBITDA was \$226 million, \$42 million lower than third quarter 2016 primarily driven by:

- Gulf Coast: \$46 million decrease due to lower realized energy prices and lower generation, partially offset by lower operating expenses, net of outages due to flooding in the region.
- East/West¹: \$4 million increase from higher capacity revenues, partially offset by lower energy margins and unfavorable trading results in BETM.

Retail: Third quarter Adjusted EBITDA was \$276 million, \$28 million lower than third quarter 2016 due to mild weather, impacts from Hurricane Harvey, and higher supply costs, partially offset by customer growth and reduced operating costs.

Renewables: Third quarter Adjusted EBITDA was \$66 million, \$11 million lower than third quarter 2016 due to lower solar generation at Ivanpah and higher operating expenses.

NRG Yield: Third quarter Adjusted EBITDA was \$265 million, \$13 million higher than third quarter 2016 due to the acquisition of the Utah utility-scale solar portfolio and higher conventional availability, partially offset by lower renewable resources in the current quarter.

Corporate: Third quarter Adjusted EBITDA was \$(27) million, \$21 million lower than the third quarter 2016 due to a reduction in shared service income, partially offset by lower corporate marketing expenses and the elimination of operating losses at residential solar following its full wind down of operations.

¹Includes International, BETM and generation eliminations.

NRG-Level cash as of September 30, 2017, pro-forma for the debt repurchases completed in October 2017, was \$383 million, a decrease of \$187 million from December 31, 2016. As of September 30, 2017, total liquidity was \$2.7 billion, including \$1,604 million of the Company's credit facilities, as well as \$537 million restricted cash and \$225 million cash at non-guarantor subsidiaries (primarily NRG Yield).

NRG Strategic Developments

Transformation Plan

As of the end of the third quarter of 2017, NRG has realized \$92 million, or 142%, of its 2017 cost savings target as part the previously announced Transformation Plan. With respect to the targeted asset sales under the Transformation Plan, NRG continues to expect up to \$4 billion of net cash

proceeds, with transactions leading to a majority of those proceeds announced by year end 2017, and the balance in 2018. NRG anticipates these sales to include 100% of its interest in NRG Yield and its Renewables platform.

NRG Yield

Closed the November 2017 Drop Down Transaction

On November 1, 2017, NRG sold a 38 MW solar portfolio to NRG Yield primarily comprised of assets from NRG's Solar Power Partners (SPP) funds, in addition to other projects developed by NRG for cash consideration of \$71 million, excluding working capital adjustments.

Investment Partnership with NRG Yield

Pursuant to the ROFO Agreement on September 26, 2017, NRG formed a new investment partnership in which NRG Yield would invest up to \$50 million in a portfolio of distributed solar assets, primarily comprised of community solar projects, developed by NRG.

Drop Down Offer to NRG Yield

Pursuant to the ROFO Agreement, NRG offered NRG Yield the opportunity to acquire Buckthorn Solar, a 154 MW solar facility located near Fort Stockton, Texas with a 25-year PPA with the City of Georgetown.

Outlook for 2017 and Initiation of 2018 Guidance

NRG has decreased and narrowed the range of its Adjusted EBITDA and FCF before growth investments guidance for 2017 and is initiating guidance for fiscal year 2018. The 2018 guidance does not include the impact from targeted asset sales announced on July 12, 2017, as part of the Transformation Plan.

1.Non-GAAP financial measure; see Appendix Tables A-1 through A-5 for GAAP Reconciliation to Net Income that excludes fair value adjustments related to derivatives. The Company is unable to provide guidance for Net Income due to the impact of such fair value adjustments related to derivatives in a given year.

Capital Allocation Update

In October 2017, the Company redeemed \$398 million of its 7.625% 2018 Senior Notes through a tender offer at an early redemption percentage of 101.42%, and \$206 million of its 7.875% 2021 Senior Notes through a tender offer at an average early redemption percentage of 102.625%. This generated approximately \$47 million of annualized interest savings and extended the Company's nearest corporate bond maturity to July 2022.

On October 18, 2017, NRG declared a quarterly dividend on the company's common stock of \$0.03 per share, payable November 15, 2017, to stockholders of record as of November 1, 2017. This represents \$0.12 on an annualized basis.

The Company's common stock dividend, debt reduction and share repurchases are subject to available capital, market conditions and compliance with associated laws and regulations.

In addition to historical information, the information presented in this press release includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act. These statements involve estimates, expectations, projections, goals, assumptions, known and unknown risks and uncertainties and can typically be identified by terminology such as "may," "should," "could," "objective," "projection," "forecast," "goal," "guidance," "outlook," "expect," "intend," "seek," "plan," "think," "anticipate," "estimate," "predict," "target," "potential" or "continue" or the negative of these terms or other comparable terminology. Such forward-looking statements include, but are not limited to, statements about the Company's future revenues, income, indebtedness, capital structure, plans, expectations, objectives, projected financial performance and/or

business results and other future events, and views of economic and market conditions.

Although NRG believes that its expectations are reasonable, it can give no assurance that these expectations will prove to be correct, and actual results may vary materially. Factors that could cause actual results to differ materially from those contemplated herein include, among others, general economic conditions, hazards customary in the power industry, weather conditions, including wind and solar performance, competition in wholesale power markets, the volatility of energy and fuel prices, failure of customers to perform under contracts, changes in the wholesale power markets, changes in government regulations, the condition of capital markets generally, our ability to access capital markets, unanticipated outages at our generation facilities, adverse results in current and future litigation, failure to identify, execute or successfully implement acquisitions, repowerings or asset sales, our ability to implement value enhancing improvements to plant operations and companywide processes, our ability to implement and execute on our publicly announced transformation plan, including any cost savings, margin enhancement, asset sale, and net debt targets, our ability to proceed with projects under development or the inability to complete the construction of such projects on schedule or within budget, risks related to project siting, financing, construction, permitting, government approvals and the negotiation of project development agreements, our ability to progress development pipeline projects, the timing or completion of the GenOn restructuring, the inability to maintain or create successful partnering relationships, our ability to operate our businesses efficiently, our ability to retain retail customers, our ability to realize value through our commercial operations strategy and the creation of NRG Yield, the ability to successfully integrate businesses of acquired companies, our ability to realize anticipated benefits of transactions (including expected cost savings and other synergies) or the risk that anticipated benefits may take longer to realize than expected, our ability to close the Drop Down transactions with NRG Yield, and our ability to execute our Capital Allocation Plan. Debt and share repurchases may be made from time to time subject to market conditions and other factors, including as permitted by United States securities laws. Furthermore, any common stock dividend is subject to available capital and market conditions.

NRG undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. The adjusted EBITDA and free cash flow guidance are estimates as of November 2, 2017. These estimates are based on assumptions the company believed to be reasonable as of that date. NRG disclaims any current intention to update such guidance, except as required by law. The foregoing review of factors that could cause NRG's actual results to differ materially from those contemplated in the forward-looking statements included in this press release should be considered in connection with information regarding risks and uncertainties that may affect NRG's future results included in NRG's filings with the Securities and Exchange Commission at www.sec.gov.

EBITDA and Adjusted EBITDA are non-GAAP financial measures. These measurements are not recognized in accordance with GAAP and should not be viewed as an alternative to GAAP measures of performance. The presentation of Adjusted EBITDA should not be construed as an inference that NRG's future results will be unaffected by unusual or non-recurring items.

EBITDA represents net income before interest (including loss on debt extinguishment), taxes, depreciation and amortization. EBITDA is presented because NRG considers it an important supplemental measure of its performance and believes debt-holders frequently use EBITDA to analyze operating performance and debt service capacity. EBITDA has limitations as an analytical tool, and you should not consider it in isolation, or as a substitute for analysis of our operating results as reported under GAAP. Some of these limitations are:

- EBITDA does not reflect cash expenditures, or future requirements for capital expenditures, or contractual commitments;
- EBITDA does not reflect changes in, or cash requirements for, working capital needs;
- EBITDA does not reflect the significant interest expense, or the cash requirements necessary to service interest or principal payments, on debt or cash income tax payments;
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and EBITDA does not reflect any cash requirements for such replacements; and
- Other companies in this industry may calculate EBITDA differently than NRG does, limiting its usefulness as a comparative measure.

Because of these limitations, EBITDA should not be considered as a measure of discretionary cash available to use to invest in the growth of NRG's business. NRG compensates for these limitations by relying primarily on our GAAP results and using EBITDA and Adjusted EBITDA only supplementally. See the statements of cash flow included in the financial statements that are a part of this news release.

Adjusted EBITDA is presented as a further supplemental measure of operating performance. As NRG defines it, Adjusted EBITDA represents EBITDA excluding impairment losses, gains or losses on sales, dispositions or retirements of assets, any mark-to-market gains or losses from accounting for derivatives, adjustments to exclude the Adjusted EBITDA related to the non-controlling interest, gains or losses on the repurchase, modification or extinguishment of debt, the impact of restructuring and any extraordinary, unusual or non-recurring items plus adjustments to reflect the Adjusted EBITDA from our unconsolidated investments. The reader is encouraged to evaluate each adjustment and the reasons NRG considers it appropriate for supplemental analysis. As an analytical tool, Adjusted EBITDA is subject to all of the limitations applicable to EBITDA. In addition, in evaluating Adjusted EBITDA, the reader should be aware that in the future NRG may incur expenses similar to the adjustments in this news release.

Management believes Adjusted EBITDA is useful to investors and other users of NRG's financial statements in evaluating its operating performance because it provides an additional tool to compare business performance across companies and across periods and adjusts for items that we do not consider indicative of NRG's future operating performance. This measure is widely used by debt-holders to analyze operating performance and debt service capacity and by equity investors to measure our operating performance without regard to items such as interest expense, taxes, depreciation and amortization, which can vary substantially from company to company depending upon accounting methods and book value of assets, capital structure and the method by which assets were acquired. Management uses Adjusted EBITDA as a measure of operating performance to assist in comparing performance from period to period on a consistent basis and to readily view operating trends, as a measure for planning and forecasting overall expectations, and for evaluating actual results against such expectations, and in communications with NRG's Board of Directors, shareholders, creditors, analysts and investors concerning its financial performance.

Adjusted cash flow from operating activities is a non-GAAP measure NRG provides to show cash from operations with the reclassification of net payments of derivative contracts acquired in business combinations from financing to operating cash flow, as well as the add back of merger, integration and related restructuring costs. The Company provides the reader with this alternative view of operating cash flow because the cash settlement of these derivative contracts materially impact operating revenues and cost of sales, while GAAP requires NRG to treat them as if there was a financing activity associated with the contracts as of the acquisition dates. The Company adds back merger, integration related restructuring costs as they are one time and unique in nature and do not reflect ongoing cash from operations and they are fully disclosed to investors.

Free cash flow (before Growth Investments) is adjusted cash flow from operations less maintenance and environmental capital expenditures, net of funding, preferred stock dividends and distributions to non-controlling interests and is used by NRG predominantly as a forecasting tool to estimate cash available for debt reduction and other capital allocation alternatives. The reader is encouraged to evaluate each of these adjustments and the reasons NRG considers them appropriate for supplemental analysis. Because we have mandatory debt service requirements (and other

non-discretionary expenditures) investors should not rely on Free Cash Flow before Growth Investments as a measure of cash available for discretionary expenditures.

Free Cash Flow before Growth Investments is utilized by Management in making decisions regarding the allocation of capital. Free Cash Flow before Growth Investment is presented because the Company believes it is a useful tool for assessing the financial performance in the current period. In addition, NRG's peers evaluate cash available for allocation in a similar manner and accordingly, it is a meaningful indicator for investors to benchmark NRG's performance against its peers. Free Cash Flow before Growth Investment is a performance measure and is not intended to represent net income (loss), cash from operations (the most directly comparable U.S. GAAP measure), or liquidity and is not necessarily comparable to similarly titled measures reported by other companies.
