PRINCETON, N.J.--(BUSINESS WIRE)--Feb. 7, 2018-- "Today's announcement represents a significant milestone in simplifying our value proposition, optimizing our portfolio, and strengthening our balance sheet to create significant shareholder value," said Mauricio Gutierrez, President and Chief Executive Officer, NRG. "These sale processes were rigorous and highly competitive. I am pleased with the outcome and confident in our ability to work with our counterparties to bring these transactions to a swift close."

NRG Sells Ownership in NRG Yield and Renewable Platform

NRG Energy, Inc. (NYSE: NRG) and Global Infrastructure Partners (GIP) have entered into a Purchase Agreement for GIP to purchase NRG's ownership in NRG Yield and NRG's Renewables Platform for cash proceeds of \$1.375 billion, subject to certain adjustments.

The purchase and sale agreement includes the sale of NRG's ownership in NRG Yield's Class B and Class D shares, NRG's renewable energy development and operations platforms, NRG's renewable energy non-ROFO (Right of First Offer) backlog and pipeline, and the NRG ROFO updated pipeline, with the exception of four assets which are addressed in separate agreements as further detailed below.

The transaction is expected to close in the second half of the year and is subject to various customary closing conditions, approvals and consents, including: Federal Energy Regulatory Commission (FERC); California Public Utility Commission (CPUC); Connecticut Public Utilities Regulatory Authority (CT PURA); Department of Energy (DOE); Pennsylvania Public Utilities Authority (PAPUC); and antitrust review under Hart-Scott-Rodino. The transaction is not subject to shareholder approval.

The sale of NRG's Renewables Platform and NRG's interest in NRG Yield does not impact NRG's commitment to provide comprehensive energy solutions for corporate and residential customers.

NRG ROFO and Accelerated Drop Downs to NRG Yield

NRG and NRG Yield entered into Purchase and Sale Agreements for NRG Yield to purchase NRG's interest in the following ROFO pipeline assets: 527 MW Carlsbad Energy Center and 154 MW Buckthorn Solar for additional cash proceeds of \$407 million, subject to certain adjustments.

The Carlsbad Energy Center and Buckthorn Solar drop downs are expected to close before year-end and are subject to both projects achieving commercial operations status as well as various customary closing conditions and approvals.

As part of the sale of NRG's interest in NRG Yield, NRG and NRG Yield agreed to maintain a ROFO agreement for NRG's remaining 102 net MW ownership in Agua Caliente, and also amended the ROFO agreement to remove Ivanpah as a ROFO asset.

NRG Sells South Central Business

NRG and Cleco Corporate Holdings LLC (Cleco) entered into a Purchase and Sale Agreement for Cleco to purchase NRG's South Central business for a total purchase price and cash proceeds of \$1.0 billion, subject to certain adjustments.

The South Central business owns and operates a 3,555 MW portfolio of generation assets consisting of 225 MW Bayou Cove, 430 MW Big Cajun-I, 1,461 MW Big Cajun-II, 1,263 MW Cottonwood and 176 MW Sterlington, and serves a customer base of cooperatives, municipalities and regional utilities under load contracts.

As part of the transaction, NRG is further optimizing value through entering into a sale leaseback agreement for its 1,263 MW Cottonwood plant, a highly efficient CCGT natural gas-fired combined cycle plant, through May 2025.

The transaction is expected to close in the second half of the year and is subject to various customary closing conditions, approvals and consents; including: Federal Energy Regulatory Commission (FERC); Louisiana Public Service Commission (LPSC); Committee on Foreign Investment in the United States (CFIUS); and antitrust review under Hart-Scott-Rodino.
