## **Reliant Energy, Rangers Fans Aim to Set New Guinness World Record in Celebration of Summer, Company's New Solar Solutions Program**

### ***June 21 Rangers vs. Astros Game Site for Record Attempt***

HOUSTON — On the first day of summer, fans at the Texas Rangers vs. Astros game will attempt to set a new world record for the “Most People Wearing Sunglasses ...in the Dark,” to celebrate the day of the year with the most sunlight and Reliant Energy’s new Solar Solutions for residential electricity customers.

To be part of setting a new world record, baseball fans will be asked to don their sunglasses at the end of the 6<sup>th</sup> inning of the June 21 game and wear them for 10 minutes as the sun makes an appearance in sections 314 and 315. Reliant will provide 30,000 sunglasses to fans as they arrive for the Tuesday night Rangers vs. Astros game at The Ballpark in Arlington.

An official adjudicator from Guinness World Records™ will be onsite to immediately confirm the successful attempt.

Seats in the sections where the sun will make its appearance will be occupied by approximately 500 Cub Scouts, Boy Scouts, friends and family members from Circle Ten Council, Boy Scouts of America who will be guests of Reliant Energy.

Reliant Solar Solutions makes installing home solar generation easy and affordable and puts customers in control of their electricity costs now and in the future.

“This program brings innovation home and gives our customers great options for worry-free, affordable renewable energy,” said Karen Jones, Chief Marketing Officer, Reliant Energy. “And, this is a great way to introduce it with the Rangers and Astros and their great fans, many of whom are Reliant customers.”

Reliant's Solar Solutions includes innovative leasing options that take the risk out of residential solar power by guaranteeing the electricity production of each system and providing repairs for the full term of the lease. Reliant offers a variety of solar lease options, a network of professional installers, solar energy buy-back plans that provide bill credits for surplus electricity generated and additional smart energy services. Each lease is individually calculated based on a number of factors including the size of the system, geographic location and electricity usage.

"Our customers have told us they are looking for ways to reduce their impact on the environment," Jones explains. "Home solar electricity - made affordable and secure by Reliant - gives our customers more control over their electricity cost and it's good for the environment."

Reliant Energy provides more renewable power to its customers than any other retail electricity provider in the Texas competitive market through its 100% Texas Wind Plans and by including 20% renewable energy in its other term plans.

For more information on this program, customers can call 1-866-RELIANT or visit [www.reliant.com/solar](http://www.reliant.com/solar).

### **About Reliant Energy**

Reliant Energy provides electricity and energy services to more than 1.5 million retail customers—including homes, small and large businesses, manufacturing facilities, government entities and institutions across Texas. The company also offers service to commercial, industrial, governmental and institutional customers in the Northeast and is expanding to offer service to residential customers in the region. As part of NRG Energy, Inc. (NYSE: NRG), Reliant Energy is backed by one of the nation's largest power producers. NRG owns and operates 25,000 megawatts (MW) of generation capacity, including more than 11,000 MW of capacity in Texas. For more information about Reliant Energy products and services, visit [www.reliant.com](http://www.reliant.com).
