

NRG's Second Quarter 2013 Results Presentation

August 9, 2013

Safe Harbor

Forward Looking Statements

In addition to historical information, the information presented in this communication includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Exchange Act. These statements involve estimates, expectations, projections, goals, assumptions, known and unknown risks and uncertainties and can typically be identified by terminology such as “may,” “should,” “could,” “objective,” “projection,” “forecast,” “goal,” “guidance,” “outlook,” “expect,” “intend,” “seek,” “plan,” “think,” “anticipate,” “estimate,” “predict,” “target,” “potential” or “continue” or the negative of these terms or other comparable terminology. Such forward-looking statements include, but are not limited to, statements about the anticipated benefits of the merger between NRG and GenOn, the Company’s future revenues, income, indebtedness, capital structure, plans, expectations, objectives, projected financial performance and/or business results and other future events, and views of economic and market conditions.

Although NRG believes that its expectations are reasonable, it can give no assurance that these expectations will prove to have been correct, and actual results may vary materially. Factors that could cause actual results to differ materially from those contemplated above include, among others, general economic conditions, hazards customary in the power industry, weather conditions, competition in wholesale power markets, the volatility of energy and fuel prices, failure of customers to perform under contracts, changes in the wholesale power markets, changes in government regulation of markets and of environmental emissions, the condition of capital markets generally, our ability to access capital markets, unanticipated outages at our generation facilities, adverse results in current and future litigation, failure to identify or successfully implement acquisitions and repowerings, our ability to implement value enhancing improvements to plant operations and companywide processes, our ability to obtain federal loan guarantees, the inability to maintain or create successful partnering relationships, our ability to operate our businesses efficiently including NRG Yield, our ability to retain retail customers, our ability to realize value through our commercial operations strategy and the creation of NRG Yield, the ability to successfully integrate the businesses of NRG and GenOn, the ability to realize anticipated benefits of the transaction (including expected cost savings and other synergies) or the risk that anticipated benefits may take longer to realize than expected, and share repurchase under the Capital Allocation Plan may be made from time to time subject to market conditions and other factors, including as permitted by United States securities laws. Furthermore, any common stock dividend is subject to available capital and market conditions.

NRG undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. The adjusted EBITDA and free cash flow guidance are estimates as of August 9, 2013. These estimates are based on assumptions believed to be reasonable as of that date. NRG disclaims any current intention to update such guidance, except as required by law. The foregoing review of factors that could cause NRG’s actual results to differ materially from those contemplated in the forward-looking statements included in this Earnings Presentation should be considered in connection with information regarding risks and uncertainties that may affect NRG’s future results included in NRG’s filings with the Securities and Exchange Commission at www.sec.gov.

Agenda

- + Overview – *D. Crane*
- + Operations and Commercial Review – *M. Gutierrez*
- + Financial Results – *K. Andrews*
- + Closing Remarks and Q&A – *D. Crane*

Financial and Business Update

Below Expectation Financial Performance...

- ❖ \$594 MM Q2 2013 adjusted EBITDA, including \$140 MM from Retail
- ❖ \$967 MM 1H 2013 adjusted EBITDA, including \$243 MM from Retail

...Arising Primarily Out of Near Term Market Conditions Impacting our Texas Generation and Retail Franchise...

- ❖ In Q2 2013, CDDs were 6% below the 10-year average and 14% below last 2nd quarter 2012¹
- ❖ August '13 ERCOT-H on-peak power prices have collapsed: >50% reduction between early June and end of July²

...Leads Us to Reduce and Narrow 2013 Financial Guidance, but Reaffirm 2014 Financial Guidance...

(\$ millions)	2013	2014
Adjusted EBITDA <i>(Previous)</i>	\$2,550-\$2,700 <i>(\$2,615-\$2,815)</i>	\$2,850 - \$3,050 <i>(Reaffirmed)</i>
Free Cash Flow, before growth <i>(Previous)</i>	\$1,050-\$1,200 <i>(\$1,050-\$1,250)</i>	\$1,100-\$1,300 <i>(Reaffirmed)</i>

...In Significant part Because 2014 will Benefit from Critical Growth and Strategic Positioning Initiatives Implemented in 2013

- ❖ **Increased** synergies from the GenOn transaction; now resulting in over \$480 MM of annual free cash flow benefits by 2014³
- ❖ **Closed** IPO of NRG Yield (NYSE: NYLD); ~\$460 MM of proceeds
- ❖ **Achieved** COD on Marsh Landing, El Segundo, Parish Peaker, Dover gas conversion; closed the acquisition of the Gregory Cogeneration plant
- ❖ **Advancing** solar: ~66 MW in new utility scale projects; largest contiguous rooftop solar array in the world at Mandalay Bay Resort
- ❖ **Grew** Retail customer count by 23,000 during the second quarter

★ Strong Execution of Growth Program Continues to Position NRG for Success in 2014 and Beyond ★

¹Source: NOAA and NRG Estimates. CDDs = Cooling Degree Days. Measured CDDs are for whole state of TX;²NRG Estimates;³Includes additional \$15 MM of cost synergies as more fully described on slide 4

GenOn Acquisition: Synergy Report Card

(\$ millions)

	Annual Run Rate (by 2014)		
	Revised	Executed ¹	%
Total Cost <i>Previous²</i>	\$215 <i>\$200</i>	\$147	68%
Operational	\$125	\$99	79%
Adjusted EBITDA <i>Previous²</i>	\$340 <i>\$325</i>	\$246	72%
Balance Sheet Efficiencies	\$142	\$142	100%
Total Cash Flow Benefits³ <i>Previous²</i>	\$482 <i>\$467</i>	\$388	81%

- Improvements Driven By:**
- ✓ Increase in Insurance Synergies
 - ✓ Incremental Reduction in Consulting Requirements
 - ✓ Further Workforce Reduction

- Estimated 2013 Contribution:**
- ✓ ~\$200 MM for full year
 - ✓ ~\$76 MM realized in 1H13

★ On Track, and Continuing to Improve Upon, Combination Synergy Targets ★

¹As of July 1, 2013; ²As previously disclosed on June 24, 2013; ³Excludes additional free cash flow improvements relating to reductions in maintenance capex

★ Construction Program Materially on Track and Close to Full Completion; ★
Solidifying Future EBITDA and Creating Growth Opportunities for NRG Yield

¹Includes projects owned by NRG and its affiliates, including NRG Yield; ²Operational MWs as of June 30, 2013; ³Includes projects completed prior to 2012 (Blythe (21 MW), Avenal (23 MW) and Roadrunner (20 MW)); ⁴Represents NRG's share in utility scale development projects only, excludes distributed solar; ⁵All figures are MW(AC) and net of station load.

A Long Term Strategic Perspective

NRG's Competitive Energy Business Model...

...is Meaningfully Enhanced by the Success of ...

Renewables enabled by long term PPAs and leases with utility and corporate off-takers

NRG YIELDSM
competitive cost of capital for contracted assets

In low gas price environment, long term contracted assets are the key to replacement capacity market for conventional assets

★ **NRG: Competitive Energy Company Well Positioned for Value Enhancing Growth in the 21st Century** ★

Operations and Commercial Review

Operations Highlights – Q2 2013

+ Top quartile safety results and improved plant performance

- ✓ Top quartile performance with an OSHA recordable rate of 0.84
- ✓ Improved coal availability and reliability metrics

+ Integrated platform affected by mild weather in Texas

- ✓ Retail business results consistent with revised expectations
- ✓ Portfolio benefits from regional diversification

+ Delivering on growth projects

- ✓ Achieved on time commercial operations at Marsh Landing, Dover gas conversion, Parish peaker and El Segundo construction projects
- ✓ Utility scale solar largely on track ~490 MW¹ in operation. An additional ~330 MW¹ scheduled to come online in 2H13

¹Net of capacity attributable to non-controlling interest

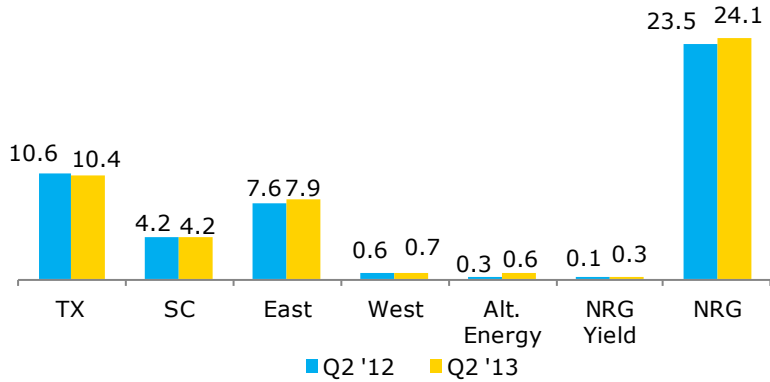

Q2 2013 Plant Operations

Safety: Top Quartile OSHA Recordable Rate¹

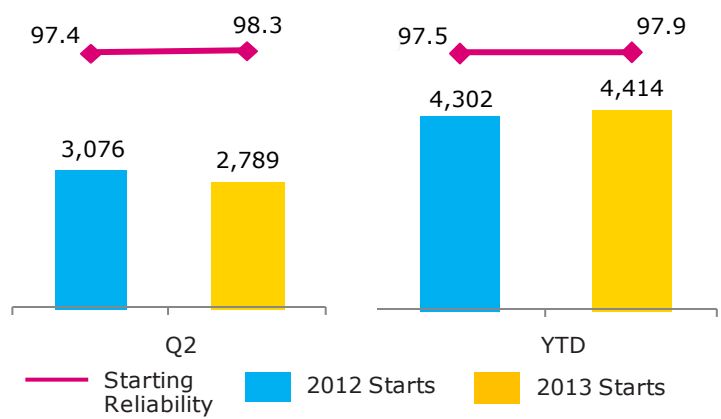

Net Production (TWh)²

Coal and Nuclear Availability - EAF³

Gas/Oil Units Starting Reliability

Top quartile safety performance; improved availability year to date

¹Top decile and top quartile based on Edison Electric Institute 2011 Total Company Survey results; ²All NRG-owned domestic generation; excludes line losses, station service, and other items. 2012 performance shown is for combined company; ³Equivalent Availability Factor (EAF)- The percentage of maximum equivalent generation available. 2012 performance shown is for combined company

Q2 2013 Retail Operations Update

Highlights

- Delivered \$140 million in adjusted EBITDA: within expectations of revised guidance
- Increased customer count for 10th consecutive quarter
- Volumes YTD consistent with 2012: Mild weather in TX offset by customer count in NE
- Unit margins YTD impacted by higher supply costs, mild weather and C&I segment

Mild Texas Weather: CDDs¹ Apr-Jun

↓ 19% vs. 2012
 ↓ 10% vs. 10 Yr Avg

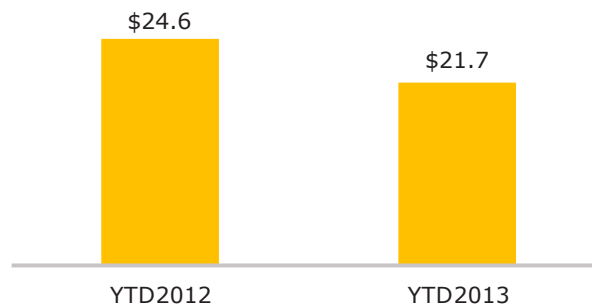

↓ 21% vs. 2012
 ↓ 11% vs. 10 Yr Avg

Continued Customer Growth (000s)

Gross Margin (\$/MWh)²

Results within revised expectations; maintaining long term focus on business

¹Source: NOAA and NRG estimates. CDDs= Cooling Degree days; ²Gross Margin is revenues less cost of goods sold. Excludes O&M and SG&A

Market Update

ERCOT: Mild Weather Leading to Collapse in Summer Prices...

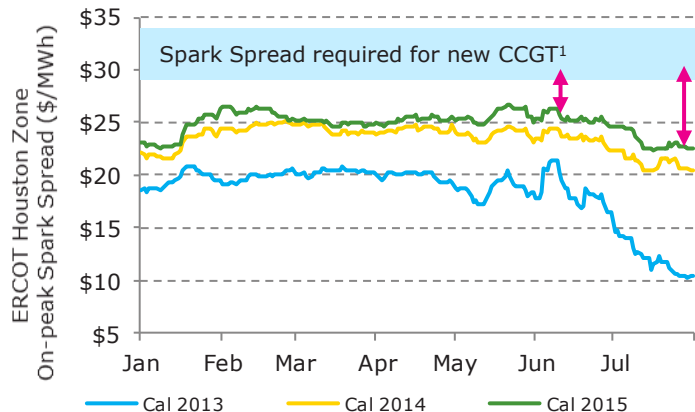

Source: ERCOT, NRG Estimates. Actual = real-time for Jun-Jul and forwards for Aug-Sep

Portfolio Benefits from Stronger Load Outside of Texas...

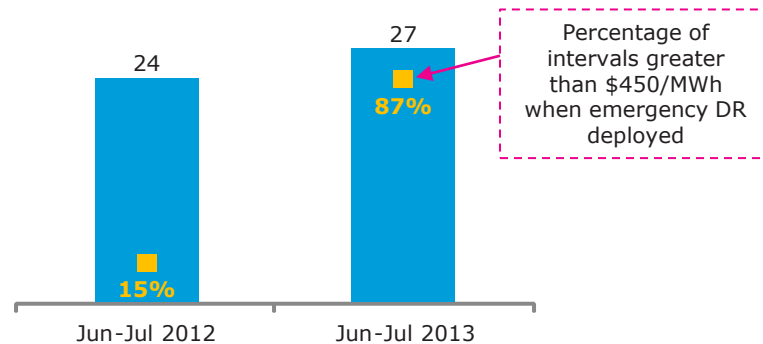

Source: PIRA, Regional ISO's, NRG estimates

...and Forwards Despite Strong Fundamentals

Source: ERCOT, NRG Estimates. Cal 2013 represents actuals through July and forwards for balance of the year.

...and Improved Northeast Price Formation

Source: NYISO, NRG Estimates

ERCOT fundamentals remain strong despite weak summer prices; portfolio benefits from diversification

¹CCGT CONE range is calculated based on overnight capital cost in the range of \$800/kW to \$900/kW. Spark Spreads = (On Peak Power - 7 heat rate x Houston Ship Channel Gas).

Managing Commodity Price Risk

Coal and Nuclear Generation and Retail Hedge Position^{1,2}

Coal and Transport Hedge Position^{1,4}

Coal and Nuclear Generation Sensitivity to Gas Price and Heat Rate^{1,3}

Commercial Highlights

- ✦ Commercial integration: successful operations during the northeast heat wave
- ✦ Extended tolling agreement at Pittsburg plant in CA for one year
- ✦ Increased hedges in 2014 and 2015 for coal and nuclear fleet

Financial Results

Financial Summary

(\$ millions)	Three Months Ended June 30, 2013	Six Months Ended June 30, 2013
Wholesale	\$ 393	\$ 629
Retail	140	243
NRG Yield	61	95
Adjusted EBITDA	\$ 594	\$ 967

+ Highlights:

- + Completed NRG Yield IPO creating a premier total return vehicle in the power sector
 - Currently trading at \$28.42/share¹; implied 2014 EBITDA multiple of 12.8x²
- + Increased and repriced Term Loan B and revolver - annual Balance Sheet Efficiencies of \$142 million now exceeds original target
- + Acquired 390MW, 160MWt Gregory cogeneration plant in Texas for \$244 million
- + Acquired multiple solar projects totaling approximately 66 MW expanding opportunity for NRG Yield drop downs

+ 2013 Capital Allocation:

- + IPO proceeds from NRG Yield resulted in a \$462 million increase in cash
- + Redeemed GenOn's \$575 million 2014 Senior Notes bringing total delevering to over \$1.2 billion; significantly exceeding original target
- + \$25 million of NRG common stock repurchased through June 30, 2013; the remaining \$175 million to be completed by end of 2013

¹Closing Price on August 8, 2013; ²Based on NYLD enterprise value / EBITDA as of June 30, 2013. Implied market capitalization component of enterprise value as of August 8, 2013

Guidance Overview

<i>(\$ millions)</i>	2013	2014
Wholesale¹	\$1,735-\$1,810	\$1,965-\$2,090
Retail	\$575-\$650	\$600-\$675
NRG Yield	\$240	\$285
Adjusted EBITDA <i>(Previous)</i>	\$2,550-\$2,700 <i>(\$2,615-\$2,815)</i>	\$2,850-\$3,050 <i>(Reaffirmed)</i>
Free Cash Flow – before growth investments <i>(Previous)</i>	\$1,050-\$1,200 <i>(\$1,050-\$1,250)</i>	\$1,100-\$1,300 <i>(Reaffirmed)</i>

2014 Guidance reaffirmed while milder weather and lower wholesale prices drive reduction in 2013 Guidance

¹Total synergies of \$200 million and \$340 million are included in Wholesale results for 2013 and 2014, respectively; Wholesale guidance now includes solar assets not currently owned by NRG Yield

Components of NRG Market Value Post NRG Yield ("NYLD")

(\$ millions)

Implied Trading Value Summary	
NRG Market Cap¹	\$8,687
Less: NRG Stake in NYLD²	(1,215)
Implied Residual Equity Value	7,472
Add: NRG proportional debt³	15,397
Less: NYLD proportional debt³	(1,876)
Less: pro-forma cash⁴	(1,496)
Add: Preferred Stock	249
Implied Residual Enterprise Value	\$19,746
2014 mid-point of Residual Adjusted EBITDA	\$2,565
Implied Residual Adjusted EBITDA multiple	7.7x

(\$ millions)

Components of Adjusted EBITDA	
2014 Adjusted EBITDA	\$2,850-\$3,050
Less: NYLD Adjusted EBITDA	(285)
Adjust for proportionate Adjusted EBITDA	(100)
2014 Residual Adjusted EBITDA	\$2,465-\$2,665
2014 NRG ROFO Assets⁵ Proportionate Adjusted EBITDA	\$250

¹Assumes ~322.9 million common shares outstanding as of July 31, 2013; closing share price of \$26.90 on August 8, 2013

²Calculated based on Class B shares outstanding of 42.7 million shares at \$28.42 for NYLD, the closing share price on August 8, 2013

³Represents debt balances as of June 30, 2013. Refer to Appendix slide 25 for additional details

⁴NRG cash and cash equivalents of \$1,368 million at June 30, 2013; plus net NRG Yield IPO proceeds of \$462 million, less \$73 million retained by NRG Yield; less \$244 million for Gregory acquisition; and less \$17 million NRG Yield cash and cash equivalent balance at June 30, 2013

⁵Includes the projects identified as NRG ROFO Assets pursuant to the Right of First Offer Agreement by and between NRG and NRG Yield

NRG Yield trading value provides clearer view
of overall NRG valuation

Corporate Liquidity

	Dec 31, 2012	Jun 30, 2013
<i>\$ millions</i>		
Cash and Cash Equivalents	\$ 2,087	\$ 1,368
Restricted Cash	217	267
Total Cash	\$ 2,304	\$ 1,635
Total Credit Facility Availability	1,058	1,181
Total Current Liquidity	\$ 3,362	\$ 2,816
Post Quarter Events:		
NRG Yield IPO proceeds	-	462
Gregory acquisition	-	(244)
Pro-Forma Liquidity	\$ 3,362	\$ 3,034

Liquidity

- Strong pro-forma liquidity balance of ~ \$3.0 BN after the following year-to-date activity:

(\$ millions)

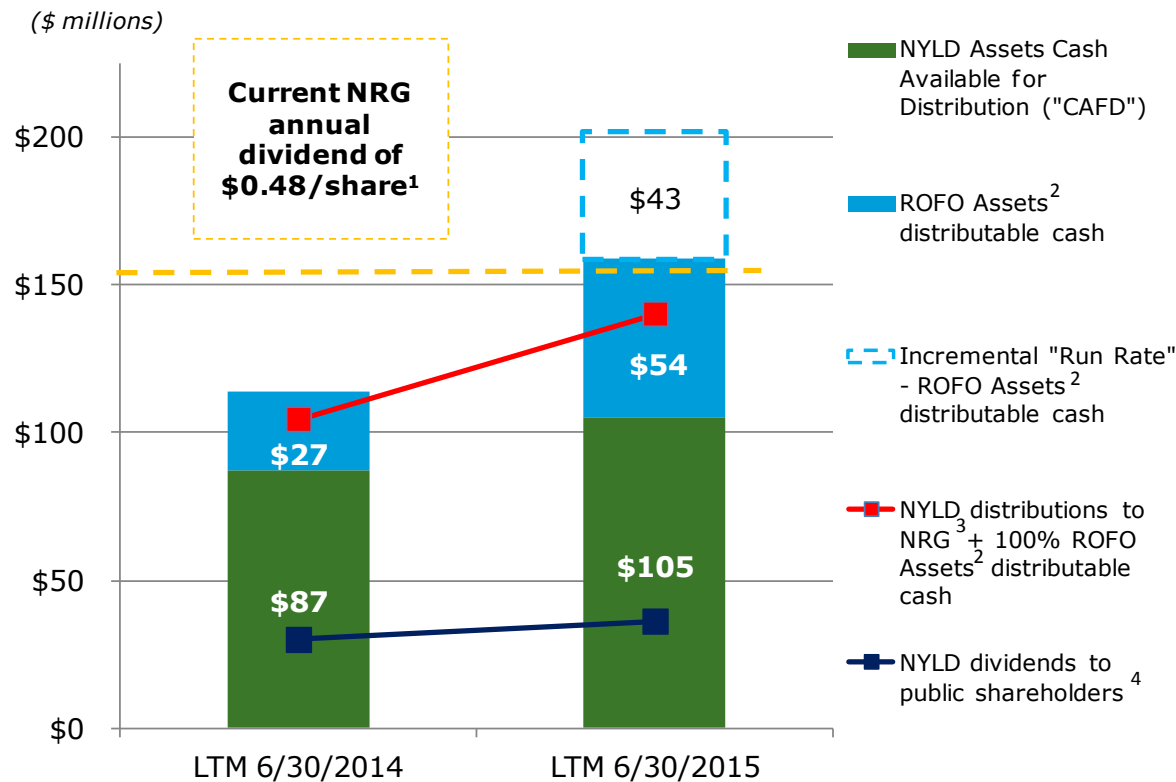

YTD Sources	
\$462	Net proceeds from NRG Yield IPO
\$450	Increase in Term Loan borrowings
\$331	Adjusted cash flow from operations
\$123	Increase in credit facility availability
YTD Uses	
\$775 and \$41	Repurchase of Senior Unsecured notes and scheduled debt amortization, respectively
\$244	Acquisition of Gregory cogeneration plant
\$203	Maintenance and environmental capex, net
\$158	Collateral deposits
\$90	Merger related payments
\$73	Preferred and common dividends
\$72	Growth investments, net
\$25	Share repurchases

NRG Yield proceeds provide continued strength in corporate liquidity after over \$1.2 billion in delevering

NRG Dividend Perspective

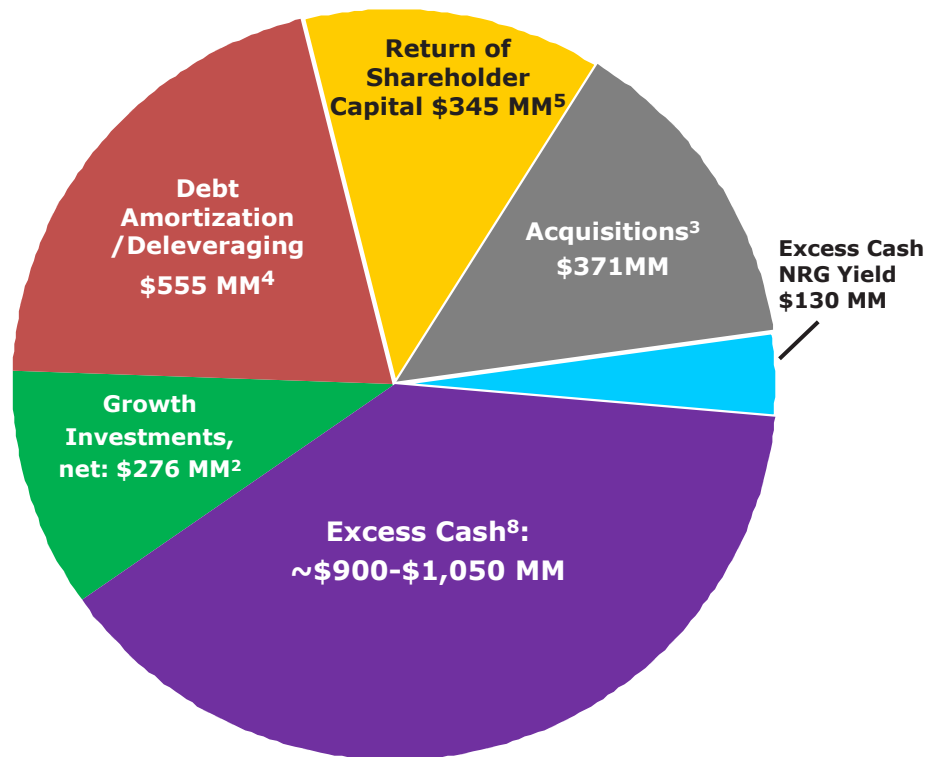

NYLD distributions to NRG and ROFO assets continue to provide strong base to support NRG dividend

¹Assumes ~322.9 million common shares outstanding as of July 31, 2013; ²Includes the projects identified as NRG ROFO Assets pursuant to the Right of First Offer Agreement by and between NRG and NRG Yield; ³65.5% of NYLD Assets CAFD * assumed 90% payout ratio; ⁴34.5% of NYLD Assets CAFD * assumed 90% payout ratio

2013 Capital Allocation Update

2012 Excess Cash¹: \$1,062 MM + **2013 FCF before Growth: \$1,050 - \$1,200 MM** + **NRG Yield IPO Proceeds: \$462 MM** = **Cash Available for Allocation: \$2,574 - \$2,724 MM**

(\$ millions)

Quarter Update	
New Sources:	
NRG Yield IPO	\$462
Increase in mid-point FCF before Growth	25
Total	\$487
New Uses:	
Net delevering - Q2 2013	\$245
Gregory Acquisition ⁶	(120)
Other ⁷	97
Total	\$222
Change in mid-point Excess Cash:	
At NYLD	\$130
At NRG, Inc.	\$135

NRG Yield IPO increases capital available for allocation; significant progress made year to date on long term value creation

¹2012 year end cash & cash equivalents of \$2,087 MM less \$900 million of targeted cash balance and \$125 million of undistributable cash

²Excludes solar acquisitions of High Desert, Kansas South and Guam, which are included in the "Acquisitions" section

³Includes Gregory acquisition; solar acquisitions of High Desert, Kansas South and Guam; GenOn Integration cost; partially offset by \$120M of proceeds from Term Loan B

⁴Includes \$775M senior note repurchases; approx \$110M scheduled debt amortization; partially offset by \$330M proceeds from Term Loan B (\$450M total proceeds less \$120M used for Gregory acquisition)

⁵Includes \$200M NRG share repurchases; \$145M common stock dividends

⁶\$120 million of proceeds from Term Loan B, used to fund purchase of Gregory cogeneration plant

⁷Acquisition of Kansas South, Guam, changes in growth investments, and other

⁸Excludes impact of margin collateral movements

Closing Remarks and Q&A

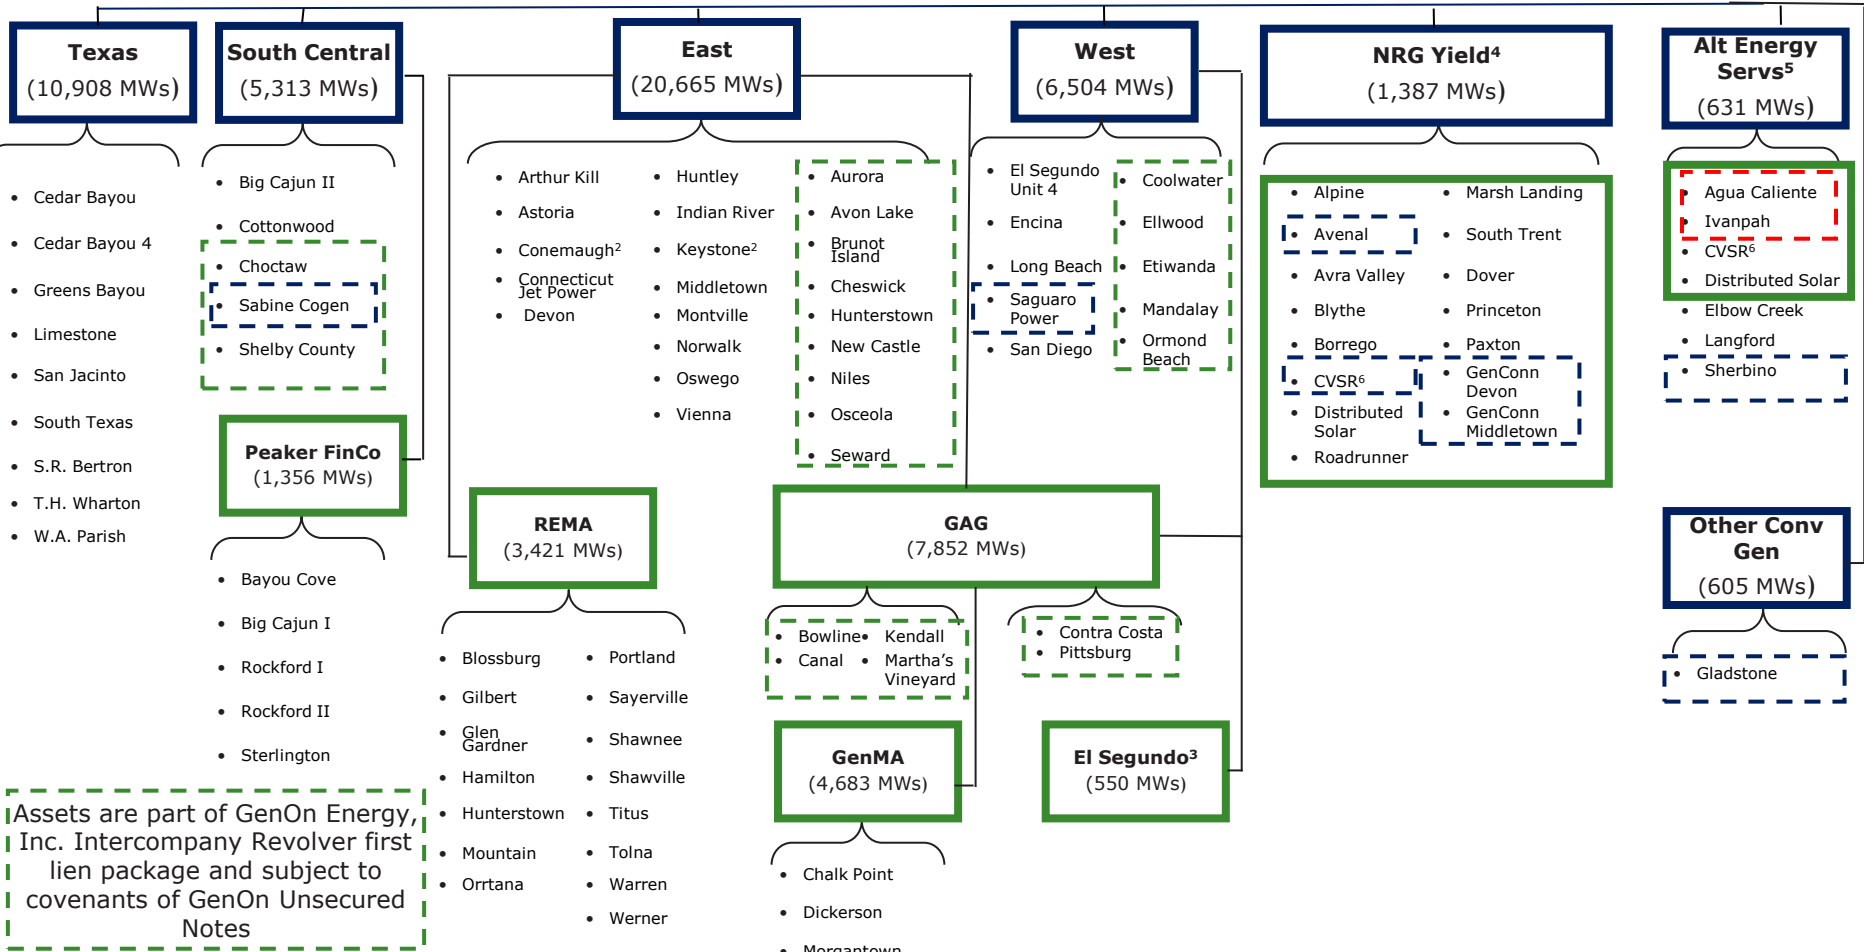

Appendix

Generation Organizational Structure

NRG Energy, Inc.
(46,013 MWs¹)

Assets are part of GenOn Energy, Inc. Intercompany Revolver first lien package and subject to covenants of GenOn Unsecured Notes

¹MW's controlled by NRG as June 30, 2013
²NRG and GenOn jointly own portions of these plants. The portion owned by GenOn is subject to REMA liens
³275 MW's on line as of June 30, 2013. 275 MW under construction, therefore not included in total MW's
⁴60 MW's under construction, therefore not included in total MW's
⁵274 MW's under construction, therefore not included in total MW's
⁶NRG Yield owns 48.95% interest in CVSR. Remaining 51.05% interest is included in Alt Energy Services

Legend

- Projects have non-controlling interest
- Equity investments
- Segments
- Separate credit facility

Ivanpah 2, 64 MW	▶				
Ivanpah 3, 64 MW	▶				
Agua Caliente, 148 MW	▶				
California Valley Solar Ranch, 250 MW	▶				
Guam, 26 MW	▶				
Solar MW¹	490²	623	808	808	835
El Segundo, 550 MW³	▶				
Conventional MW	857⁴	1,407	1,407	1,407	1,407

¹Includes MW's owned by both NRG and NRG Yield. Utility scale development projects only; excludes distributed solar. Includes only NRG's share in solar projects. Construction period to substantial completion dates shown; COD MWs under PPAs shown by quarter; for some projects, COD is achieved prior to overall substantial completion. All figures are MW's (ac) and are net of station load

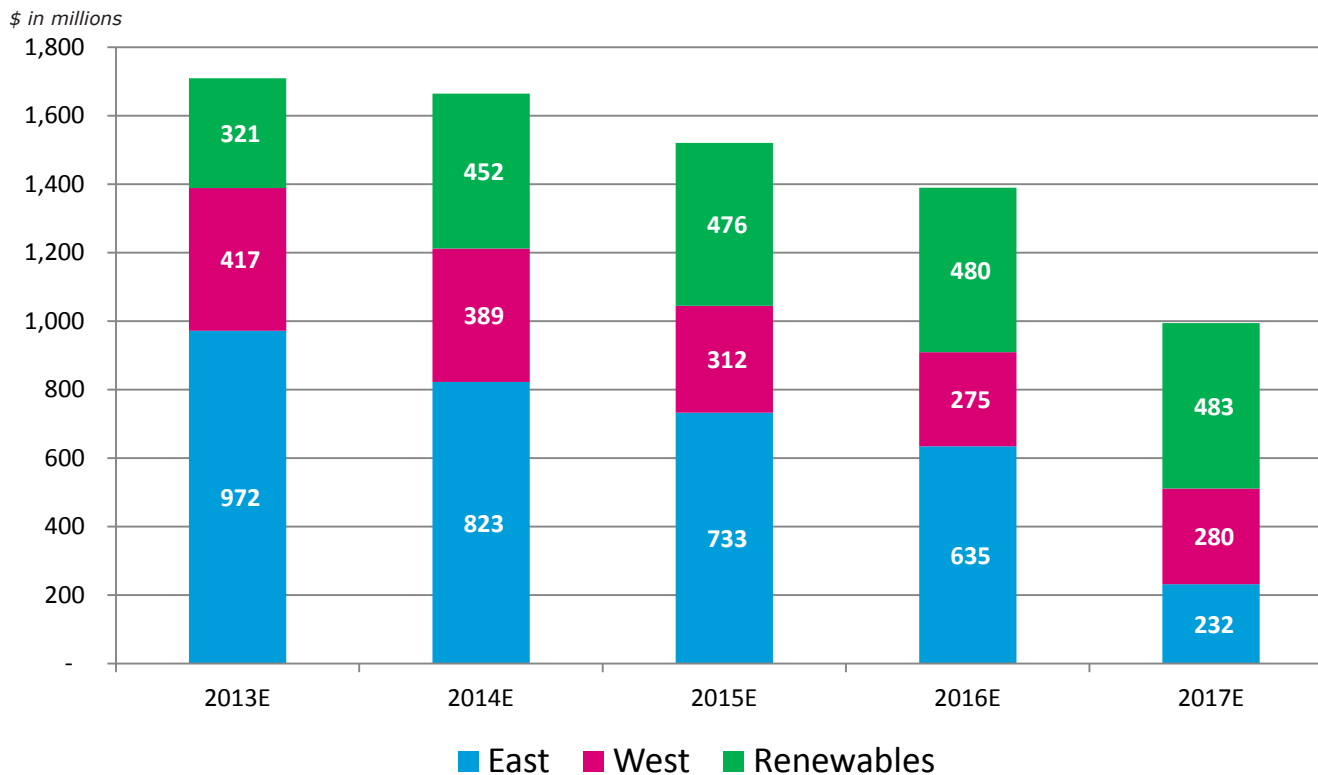

²Includes Blythe (21 MW), Avenal (23 MW, net NRG), Roadrunner (20 MW), Avra Valley (25 MW), Alpine (66 MW), Borrego (26 MW), TA High Desert (20 MW), Kansas South (20 MW), and first blocks of Agua Caliente (142 MW, net NRG) and CVSR (192 MW) all net NRG ownership share as of end of Q22013

³El Segundo entered commercial operations on August 1, 2013

⁴Includes Marsh Landing (720 MW) which achieved COD on May 1, 2013; WA Parish Peaker (75 MW) which achieved COD on June 26, 2013; Dover Coal to Gas Conversion (62 MW) which achieved COD on May 31, 2013

Fixed Contracted and Capacity Revenue

Notes:

- East includes cleared capacity auction results for PJM and New England through May 2017, inclusive of Thermal assets
- West includes committed Resource Adequacy contracts and tolling agreements for our El Segundo and Marsh Landing projects
- Renewables includes wind and solar contracted assets

Capacity and Contract Revenue Sources: Generation Asset Overview¹

NRG revenues and free cash flows benefit from capacity sources originating from either market clearing capacity prices, Resource Adequacy (RA) contracts, power purchase agreement (PPA) contracts, or tolling arrangements. The ERCOT (Texas) region does not have a capacity market. In South Central², NRG earns significant capacity revenue from its long-term contracts. As of June 30, 2013, NRG had long-term all-requirements contracts with 10 Louisiana distribution cooperatives with initial terms ranging from ten to 25 years. Of the 10 contracts, nine expire in 2025 while the remaining contract expires in 2014. The table below reflects the plants and relevant capacity revenue sources for the East and West business segments.

Region/Plant	Zone	MW	Description and Tenor
NEPOOL (ISO NE):			
Capacity Auction	CT ³	1,539	
	POOL	1,126	
	NEMA	256	
Long Term Contracts	GenConn	190	Long term PPA through 2040; NRG Yield Asset
PJM:			
RPM Auction	RTO ²	2,152	
	MAAC	3,750	
	EMAAC	1,132	
	SWMAAC	4,685	
	DPL	840	Includes 106 MW Dover facility at NRG Yield
	ATSI	1,108	
New York (NYISO):			
ICAP Auction	NY ROS	2,765	
	NYC	1,332	
RSS Agreement	NY ROS ⁴	75	
California (CAISO):			
El Segundo Repowering Marsh Landing Utility Scale Solar under Long-term PPAs ⁹	SP-15 ^{5,6,7}	5,153	
	NP-15 ⁸	1,029	Tolled through various dates in 2013
	SP-15	550	COD in August 2013. 10 Year PPA
	NP-15	720	NRG Yield Asset. COD in May. 10 Year PPA
	CAISO and NM	490	PPA - 20-25 years. Includes 243 MWs at NRG Yield

1. Includes assets of NRG and NRG Yield. NRG has announced plant closures in the 2013-2015 time period which will remove capacity from various markets. For a list of such closures, refer to Item 2 Properties in the 2012 NRG 10K and as further updated in subsequent NRG 10Qs

2. South Central includes 450 MW Rockford I and II, which is in PJM and receives capacity payments at the RPM wholesale market clearing price for the RPM RTO region

3. Reflects the retirement of Norwalk Harbor in June, 2013

4. On August 27, 2012, Dunkirk Power LLC executed an agreement with National Grid to provide reliability support services from two units totaling 150 MW through May 31, 2013. The contract for the 75 MW Unit 2 has been extended to May 31, 2015, subject to NYPSC approval. The 75 MW Unit 1 was mothballed in June, 2013

5. The 260 MW Long Beach facility is tolled through August 2017, 54 MW Ellwood is fully tolled through 2014 with the 1,516 MW Ormond Beach facility tolled for energy through 2014

6. Facilities not otherwise tolled participate in RA contracts covering all or a portion of the facilities' capacity for terms generally not longer than two years forward

7. The 335 MW Unit 3 of El Segundo Power retired on June 2013

8. Contra Costa units 6 and 7 (674 MW) deactivated in May 2013.

9. Solar projects includes MW's in service as of June 30, 2013. Projects include Blythe, Alpine, Avra Valley, Avenal, Borrego, High Desert, Kansas South, Roadrunner and the partially completed Agua Caliente and CVSR projects. Each of these solar projects sell all of its capacity under 20 or 25 year full requirements PPA's. MW's are on a net ownership basis

Appendix Table A-5: NRG's Construction Program Adjusted EBITDA Reconciliation to Income Before Taxes

The following table summarizes the comparative Income before taxes to Adjusted EBITDA

<i>\$ in millions</i>	Full Year 2014
Adjusted EBITDA:	
Solar	345
Conventional Growth Investments	200
Total Adjusted EBITDA	\$ 545
Income Before Income Taxes:	
Solar	96
Conventional Growth Investments	155
Total Income Before Income Taxes	\$ 251

Reg. G

- EBITDA and Adjusted EBITDA are non-GAAP financial measures. These measurements are not recognized in accordance with GAAP and should not be viewed as an alternative to GAAP measures of performance. The presentation of Adjusted EBITDA should not be construed as an inference that NRG's future results will be unaffected by unusual or non-recurring items.
- EBITDA represents net income before interest (including loss on debt extinguishment), taxes, depreciation and amortization. EBITDA is presented because NRG considers it an important supplemental measure of its performance and believes debt-holders frequently use EBITDA to analyze operating performance and debt service capacity. EBITDA has limitations as an analytical tool, and you should not consider it in isolation, or as a substitute for analysis of our operating results as reported under GAAP. Some of these limitations are:
 - EBITDA does not reflect cash expenditures, or future requirements for capital expenditures, or contractual commitments;
 - EBITDA does not reflect changes in, or cash requirements for, working capital needs;
 - EBITDA does not reflect the significant interest expense, or the cash requirements necessary to service interest or principal payments, on debt or cash income tax payments;
 - Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and EBITDA does not reflect any cash requirements for such replacements; and
 - Other companies in this industry may calculate EBITDA differently than NRG does, limiting its usefulness as a comparative measure.
- Because of these limitations, EBITDA should not be considered as a measure of discretionary cash available to use to invest in the growth of NRG's business. NRG compensates for these limitations by relying primarily on our GAAP results and using EBITDA and Adjusted EBITDA only supplementally. See the statements of cash flow included in the financial statements that are a part of this news release.
- Adjusted EBITDA is presented as a further supplemental measure of operating performance. Adjusted EBITDA represents EBITDA adjusted for mark-to-market gains or losses, asset write offs and impairments; and factors which we do not consider indicative of future operating performance. The reader is encouraged to evaluate each adjustment and the reasons NRG considers it appropriate for supplemental analysis. As an analytical tool, Adjusted EBITDA is subject to all of the limitations applicable to EBITDA. In addition, in evaluating Adjusted EBITDA, the reader should be aware that in the future NRG may incur expenses similar to the adjustments in this news release.
- Adjusted cash flow from operating activities is a non-GAAP measure NRG provides to show cash from operations with the reclassification of net payments of derivative contracts acquired in business combinations from financing to operating cash flow, as well as the add back of merger and integration related costs. The Company provides the reader with this alternative view of operating cash flow because the cash settlement of these derivative contracts materially impact operating revenues and cost of sales, while GAAP requires NRG to treat them as if there was a financing activity associated with the contracts as of the acquisition dates. The Company adds back merger and integration related costs as they are one time and unique in nature and do not reflect ongoing cash from operations and they are fully disclosed to investors.
- Free cash flow (before growth investments) is adjusted cash flow from operations less maintenance and environmental capital expenditures, net of funding, and preferred stock dividends and is used by NRG predominantly as a forecasting tool to estimate cash available for debt reduction and other capital allocation alternatives. The reader is encouraged to evaluate each of these adjustments and the reasons NRG considers them appropriate for supplemental analysis. Because we have mandatory debt service requirements (and other non-discretionary expenditures) investors should not rely on free cash flow before growth investments as a measure of cash available for discretionary expenditures.
- Cash available for distribution is adjusted EBITDA plus cash dividends from unconsolidated affiliates, less maintenance capital expenditures, pro-rata adjusted EBITDA from unconsolidated affiliates, cash interest paid, income taxes paid, principal amortization of indebtedness and changes in others assets. Management believes cash available for distribution is a relevant supplemental measure of the Company's ability to earn and distribute cash returns to investors.
