Item 7.01 Regulation FD Disclosure

As reported in NRG Energy, Inc.'s, or the Company's, Form 10-Q for the quarter ended September 30, 2013, the Company annually, during the fourth quarter, revises its views of power and fuel prices including the Company's fundamental view for long term prices in connection with the preparation of its annual budget. Changes to the Company's views of long term power and fuel prices may impact the Company's projections of profitability, based on management's estimate of supply and demand within the sub-markets for each plant and the physical and economic characteristics of each plant. While this review is ongoing, the Company believes that its revised views of projected profitability for certain assets located primarily in the East will result in a significant adverse change in the extent to which these assets are expected to be used. The Company considers this to be an indicator of impairment and accordingly, is performing impairment tests for these assets. The Company expects to record a material impairment loss on these assets in the fourth quarter of 2013. Any impairment loss will not have an impact on the Company's cash flows or the Company's previously stated guidance estimates for 2013 and 2014.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
